The Guide Index | print scale worksheet

A4: 210 x 297 mm | version 1.0

Choose matching paper and Actual size / 100%. Print one copy first.

100 mm square: measure between line centers

Both horizontal and vertical sides should measure 100 mm.

50 mm square

Measured horizontal: _____ mm

Measured vertical: _____ mm

Measured / 100 x 100 = observed percentage for that axis.

A 94 mm side is 94%. Do not assume both axes scale equally.

This checks your printout, not ruler accuracy or printer calibration.
